Fly Away Home: Educating Families on Higher Education Options

Do you want your students to consider attending an institution out of state or far away from home, but are feeling resistance from their families? As counselors, our job is to help a student find the institution that is the best fit for them and sometimes that school is thousands of miles away. Come learn about different ways to educate families on colleges and universities that are not found right in their back yard so that they can help support your students in their decision to leave home.

How Many Licks Does It Take To Get To The Center of a Tootsie Pop?... We Finally Have the Answer!

Recently the admissions recruitment world has seen a dramatic shift. Everyday new opportunities pop up that allow students to connect, research and even apply to their top choice colleges and universities. The question then is which touch point(s) really made the difference in the students decision to apply and enroll? Through thousands of student survey responses and focus groups we will attempt to determine how many touch points and communications it takes to generate an enrollment from an inquiry. We will also share which communications have the most impact at various stages in the enrollment process. Don't take it from us... Take from the students you are recruiting!

Shift Happens: How To Build A Digital Plan To Reach Prospective Students

College research happens online every day for high school students of all grades as well as their parents. Your website is the source students trust most for information and where they go before they even step foot on campus or apply. According to Google, Higher Education marketing dollars (as a percent) spent on digital recruitment strategies lag way behind compared to the increasing student shift from traditional media consumption to digital. In this session we explore how to drive your target prospects to your website, continue a digital relationship with them, while advancing them through the funnel towards enrollment.

The School Next Door

High schools—are you interested in creating more effective partnerships with the colleges in your neighborhood? Colleges—are you interested in more effectively reaching out to high school students in your own backyard? This type of proximity offers some unique opportunities for forming partnerships with the school next door. Come prepared to hear how two colleges and two high schools have used these relationships to their advantage, and bring some of your own examples as well.

Cognitive Dissonance Theory and the College Selection Process

Understand the student thought process through psychological theory. Cognitive Dissonance Theory was developed to explain how individuals react when two pieces of information are in conflict with each other. It is enormously powerful when applied to the college search process. By applying the knowledge of this psychological theory, we can be in a better position to predict likely outcomes of specific guidance messages.

New Thinking on the College Search Funnel

New research hints that the conventional student recruitment funnel no longer applies based on how students actually think about the college search. This session will detail how the college search is anything but linear and logical, but rather is influenced by quirky intuition, mental shortcuts and often fictionalized decision rationales. Come with an open mind and join the discussion on what our collective profession thought it knew about how teenagers search for a college.

Then and Now...

In 1981, a young college counselor worked with a high school senior on her college search. What did the admission profession look like then? What were the hot issues—to both the high school counselor and to that aspiring college student? Now, 31 years later, that college counselor, while no longer young, is still working with high school seniors and that high school senior is completing her first year as an enrollment management specialist. What does our profession look like to a 34-year veteran... and to a first-year specialist? What are today's hot issues? Come learn the history of our profession and of a personal relationship that spans three decades. What was college admission like then... and now?
